

March 9, 2023

Dear Sir/Madame:

Enclosed you will find your Waste Tire Transporter license identification card and vehicle decal. This license expires February 28, 2024 and must be renewed prior to this date. The small sticker type decal contains the expiration date and must be removed and replaced. It can also be easily removed if you trade vehicles. Please display the decal(s) on the vehicle(s) you will use to transport tires – the same vehicle(s) identified on your Waste Tire Transporter License Application. You may download the free Arkansas Entergy & Environment App from the App Store if you have a smartphone. It is available for both iPhone and Android versions. The Arkansas Entergy & Environment App will provide tire collection center information electronically, including driving directions.

The following records must be available for inspection by department personnel during normal business hours for three (3) years:

1. The approximate quantity of waste, used, or processed tires collected;
2. Where or from whom the waste, used, or processed tires were collected;
3. Where the waste, used, or processed tires were deposited; and
4. For all waste or used tires collected for retreading or recapping, the quantity and type collected, and the name and location of the retreading/recapping facility receiving the tires. If the tires collected were not consigned to the originally reported facility, the actual disposition of the tires must be recorded.

For renewal purposes, you will be required to submit to the department a disclosure statement if there is a change and an annual report and renewal application summarizing the information collected under the preceding paragraph. The information must be submitted on Form TAP-2 (Waste Tire Transporter Annual Report and Renewal Application) provided by the department with the yearly renewal information packet. As a waste tire transporter licensee, you are required to maintain insurance on your vehicle(s) at all times in the business or business owner(s) name(s).

If you need information on Arkansas Highway and Transportation Department rules and regulations, including but not limited to Intra-State Trucking Authority, contact Mr. David Long of the Legal Division, Arkansas Highway and Transportation Department, at (501) 569-2158.

In all districts, a Waste Tire Manifest Program is implemented. Therefore, the tire retailers/tire generators you do business with will require you to complete a waste tire manifest and should provide you with a form.

If you have any questions, please contact me at (501) 682-0591 or email me at kent@adeq.state.ar.us.

Sincerely,

Cassie Kent
